

FRANCESCO GIANNICOLA

Cosenza, Italy / Europe | francescogiannicola1@gmail.com | github.com/metaforismo | linkedin.com/in/francescogiannicola | francescogiannicola.com

EDUCATION

Universita della Calabria Cosenza, Italy
BSc in Computer Science & Artificial Intelligence; expected graduation 2027 Sep. 2024 – Present
– Active member of the teaching quality committee; academic focus on AI systems, software engineering, algorithms, and reproducible technical work.

PROJECTS & RESEARCH

The Broadcast Ceiling / Learning Signal Density 2026
Research Artifacts, Limes Labs DOI: 10.5281/zenodo.20970205
– Developed a reproducible long-horizon RL credit-assignment artifact with finite-MDP audits, estimator-fidelity diagnostics, exact-gradient experiments, sequence-policy audits, unit tests, smoke checks, and a 32-page LaTeX paper.
– Published v0.1.0 with GitHub release assets, SHA-256 manifest, reproducibility commands, 51 passing tests, and Zenodo DOI; built Learning Signal Density to audit sample efficiency with frozen splits and costed artifacts.

Jurevo 2026 – Present
Full-Stack AI Legal Workspace jurevo.it
– Built an AI legal workspace for Italian law firms, combining authenticated web app, backend API, native Expo mobile app, document workflows, billing, storage, and LLM provider routing in a TypeScript monorepo.
– Implemented backend-managed model credentials, Supabase auth, private R2/S3 storage, Stripe billing, workflow packs, CI checks, assistant drafting, tabular review, workflows, and document editing.

Limes Axis 2026
Auditable Agent / Workflow Infrastructure github.com/Limes-Labs/limes-axis
– Built a self-hostable enterprise AI control plane for typed, permissioned, auditable human/agent workflows across operational data, approvals, connectors, and model routing.
– Implemented FastAPI/Postgres/TypeDB/Temporal/Next.js architecture with OIDC actor binding, permission scopes, append-only audit evidence, OpenAPI checks, integration tests, and local Docker runtime.

EXPERIENCE & LEADERSHIP

Founder & Content Lead Mar. 2020 – Present
Francesco Tech / Personal Brand Italy
– Built Italian tech media channels across Instagram and TikTok to 70,000+ total followers, generating 4M+ views and 2.5M+ likes through short-form content on technology, AI, gaming, and innovation.

Volunteer 2016 – Present
ENSA, Ente Nazionale Salvaguardia Ambiente Italy
– Participated in environmental, civil-protection, civil-service, and social-solidarity initiatives; organized “Babbo Natale in Corsia,” delivering gifts to children in a pediatric ward.

Volunteer 2015 – Present
ASS.A.P.L.I., Associazione Appartenenti Polizia Locale Italiana Italy
– Supported road-safety and public-awareness campaigns, including educational activities on safe driving practices, civic responsibility, and community safety.

Hackathon Participant 2024
Codemotion & Poligrafico Italiano Italy
– Built an MVP virtual assistant concept for AI-assisted anti-counterfeiting and Made in Italy supply-chain data tracing.

TECHNICAL SKILLS

Languages: TypeScript, Python, JavaScript, Swift, SQL, Solidity, Rust basics, HTML/CSS
Frontend: React, Next.js, Tailwind CSS, Expo, React Native, Electron
Backend / Data: Node.js, Express, FastAPI, Supabase, PostgreSQL, REST APIs, Cloudflare R2, Stripe
AI / ML: LLM agents, RAG, evaluation, RL experiments, PyTorch basics, verifier workflows, reproducible artifacts
Tools: Git, Docker, Linux, GitHub Actions, Playwright, LaTeX, Vercel, Cloudflare, JSON/CLI tooling

AWARDS & LANGUAGES

- **OII Italian Olympiad in Informatics:** participant.
- **Languages:** Italian native; English intermediate; French basic; Spanish basic.
